DETAILED ACTION

As a result of amendments made to plural independent claims in the Response filed 9/8/03, the following restriction between inventions has developed.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1, drawn to a threshold determining device, classified in class 702, subclass 188.
- II. Claims 3,9, 11 drawn to a comparator having a collating means, classified in class 700, subclass 67.

The inventions are distinct, each from the other because:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as a device for resetting passwords using the collating means to derive information from the first and second data sets, i.e. first and second cryptograms. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 3627

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication should be directed to Joseph A. Fischetti at telephone number (703) 305-0731.
